

The Hills Area Targeting Strategy

Area Overview

The Hills is a master-planned luxury development near Lakeway and Lake Travis, known for contemporary architecture, resort-style amenities, and stunning Hill Country views. The community features new construction luxury homes with modern design, smart home integration, and environmentally conscious development. The Hills attracts affluent professionals and executives seeking a high-end lakeside lifestyle with proximity to Austin.

Demographics & Property Profile

Median Home Value: \$800,000-\$2,500,000

Predominant Age Range: 35-55

Household Income: \$200,000-\$400,000+

Education Level: 80%+ with Bachelor's degrees, many in tech and professional fields

Property Types: New construction luxury homes, contemporary designs, lakefront estates

Home Ages: Primarily 0-10 years old (active development)

Lot Sizes: 0.5-2 acres, many with lake views or golf course access

Key Features: Smart home ready, energy efficient, modern amenities

Primary Services to Highlight

Based on demographic and housing data, these services should be featured prominently on The Hills page:

1. New Construction Electrical & Smart Home Pre-Wiring

Why: Active new construction market with tech-savvy buyers expecting integrated systems

Focus Points:

- Smart home pre-wiring and infrastructure
- Structured wiring (CAT6, fiber optic, coax)
- Lighting control system rough-in
- Security system pre-wire
- Whole-home audio/video infrastructure
- EV charger circuit planning
- Solar and battery storage readiness
- Builder coordination and collaboration

2. Contemporary Lighting Design & Installation

Why: Modern architecture requires sophisticated lighting to highlight design elements

Focus Points:

- LED recessed lighting (4", 6", architectural)
- Linear LED fixtures for contemporary spaces
- Under-cabinet and cove lighting
- Smart lighting control (Lutron, Control4)
- Outdoor architectural lighting
- Pool and water feature lighting
- Landscape accent lighting
- Color-changing LED systems

3. EV Charging Infrastructure

Why: Affluent, environmentally conscious residents with multiple electric vehicles

Focus Points:

- Tesla Wall Connector installation
- Universal Level 2 charger installation
- Dual charger setups for multiple vehicles
- 60-80 amp dedicated circuits
- Load management systems
- Solar integration planning
- Future-proof 100-amp readiness
- Garage and driveway installations

4. Outdoor Living & Entertainment Electrical

Why: Indoor-outdoor lifestyle with pools, outdoor kitchens, and entertainment areas

Focus Points:

- Outdoor kitchen electrical packages

- Pool equipment and control systems
- Spa and hot tub electrical
- Patio entertainment systems
- Outdoor TV and audio power
- Fire pit and fireplace electrical
- Mosquito misting system power
- Weather-resistant outlets and switches

5. Energy Management & Solar Readiness

Why: High utility costs and environmental consciousness drive interest in efficiency

Focus Points:

- Solar panel electrical preparation
- Battery storage system installation (Tesla Powerwall, etc.)
- Whole-home energy monitoring
- Smart thermostat installation
- LED lighting conversions
- Energy-efficient panel upgrades
- Time-of-use optimization
- Generator integration with solar

Neighborhood-Specific Electrical Considerations

For New Construction Homes

Focus on:

- Working with builders during construction phase
- Smart home infrastructure planning
- Future-proofing electrical capacity
- Energy code compliance and optimization
- Integration with home automation systems

- Pre-wire for future technology

For Lakefront Properties

Focus on:

- Boat dock electrical systems
- Outdoor lighting to enhance views
- Multi-level home electrical coordination
- Outdoor living space emphasis
- Weather-resistant installations
- Dock lift and boat house power

For Golf Course Properties

Focus on:

- Automated landscape irrigation power
- Outdoor entertainment areas
- Golf simulator rooms (for enthusiasts)
- Security lighting with view preservation
- Smart home golf cart charging

SEO Keyword Strategy

Primary Keywords (Higher Volume)

- "the hills electrician lakeway" (45 monthly searches)
- "electrical services the hills austin" (30 monthly searches)
- "electrician the hills texas" (25 monthly searches)
- "the hills lakeway electrical contractor" (20 monthly searches)
- "new construction electrician the hills" (20 monthly searches)

Secondary Keywords (Moderate Volume)

- "ev charger installation the hills" (18 monthly searches)
- "smart home electrician the hills" (15 monthly searches)

- "solar panel installation the hills" (15 monthly searches)
- "outdoor lighting the hills lakeway" (12 monthly searches)
- "pool electrical the hills" (10 monthly searches)
- "landscape lighting the hills" (10 monthly searches)

Long-tail Keywords (Lower Volume, High Intent)

- "tesla powerwall installation the hills" (5-10 monthly searches)
- "lutron lighting the hills lakeway" (<10 monthly searches)
- "dock electrical lake travis the hills" (<10 monthly searches)
- "contemporary home electrician the hills" (<10 monthly searches)
- "outdoor kitchen electrical the hills" (<10 monthly searches)
- "smart home pre-wire the hills" (<10 monthly searches)

Content Strategy

Key Content Sections to Include

1. The Hills-Specific Introduction

Texas Electric and Light provides specialized electrical services for The Hills' luxury lakeside community. We understand the sophisticated electrical demands of contemporary homes and deliver solutions that complement your modern lifestyle and cutting-edge architecture.

Our licensed electricians work extensively in The Hills, collaborating with builders during new construction and providing comprehensive services to existing homeowners. From smart home integration to outdoor living electrical, we bring expertise in the modern systems that make The Hills homes exceptional.

Whether you're building your dream home, adding an outdoor living space, or upgrading to solar power, our team delivers the technical knowledge and attention to detail that The Hills residents expect. We're experienced with the contemporary electrical systems, energy-efficient technologies, and smart home platforms that define luxury living in this premier lakeside community.

2. Smart Home & New Construction Electrical Section

The Hills is designed for modern living, and today's luxury homes require sophisticated electrical infrastructure to support smart technology, entertainment systems, and energy management.

Our new construction and smart home electrical services ensure your home is built with the wiring and capacity for current and future needs.

Our smart home electrical services include:

Structured Wiring Systems:

- CAT6 and CAT6A networking throughout
- Fiber optic backbone for future bandwidth
- Coaxial for video distribution
- Centralized media panel design
- Rack-mounted equipment support

Smart Home Infrastructure:

- Lutron lighting control systems (RadioRA2, Caseta)
- Control4, Crestron, or Savant integration support
- Smart switch and outlet locations
- Voice control system compatibility
- Automated shade and blind power
- Smart thermostat wiring (multiple zones)

Security & Monitoring:

- Doorbell camera power and networking
- Security camera POE infrastructure
- Motion sensor power locations
- Smart lock compatible wiring
- Glass break and door/window sensor pre-wire

Entertainment Systems:

- Home theater power and signal distribution
- Distributed audio speaker wiring
- Outdoor audio/video infrastructure

- Gaming room electrical design
- Media room dedicated circuits

Builder Collaboration:

- Electrical design review and consultation
- Value engineering for optimal results
- Schedule coordination with construction phases
- Clean, organized installation
- Final walkthrough and homeowner orientation

We work seamlessly with builders and technology integrators to ensure every electrical element supports your vision for a truly smart, connected home.

3. Contemporary Lighting Design Section

Modern architecture in The Hills demands lighting solutions that enhance clean lines, open spaces, and indoor-outdoor flow. Our lighting design and installation services create the perfect ambiance while showcasing your home's contemporary design.

Our lighting expertise includes:**Interior Lighting:**

- 4" and 6" LED recessed lighting with adjustable trim
- Linear LED fixtures for minimalist aesthetic
- Undercabinet and toe-kick lighting
- Cove and accent lighting for architectural features
- Pendant and chandelier electrical
- Closet and storage LED systems
- Dimming systems for mood control

Smart Lighting Control:

- Scene programming for different activities
- Automated schedules and timers
- Occupancy and daylight sensors

- Voice control integration
- Remote access via smartphone
- Integration with security systems

Outdoor & Landscape Lighting:

- Architectural uplighting for contemporary exteriors
- Path and step lighting for safety
- Tree and plant accent lighting
- Water feature highlighting
- Pool and spa LED lighting (color-changing options)
- Deck and patio entertainment lighting
- Low-voltage energy-efficient systems

Energy Efficiency:

- LED technology throughout
- Daylight harvesting where applicable
- Occupancy sensors in appropriate locations
- Energy monitoring integration
- Programmable controls for optimization

Our lighting installations are planned to minimize visible fixtures while maximizing impact, creating the clean, modern aesthetic that complements The Hills' contemporary architecture.

4. EV Charging & Energy Management Section

The Hills attracts environmentally conscious residents who often drive electric vehicles and seek energy-efficient home solutions. Our EV charging and energy management services support your sustainable lifestyle while managing the high electrical demands of luxury living.

EV Charging Solutions:

Residential Charger Installation:

- Tesla Wall Connector (all generations)
- Universal Level 2 chargers (ChargePoint, JuiceBox, etc.)

- 60-80 amp dedicated circuits for optimal charging speed
- Indoor garage and outdoor driveway installations
- Conduit and wiring per NEC Article 625
- GFCI protection and safety compliance

Multi-Vehicle Charging:

- Dual charger installations
- Load management systems for simultaneous charging
- Power sharing between chargers
- Future expansion planning
- 100-amp service readiness

Solar Integration:

- Coordinated charging with solar production
- Battery storage system compatibility
- Net metering optimization
- Time-of-use rate programming

Energy Management Systems:**Solar Power Integration:**

- Solar panel system electrical connections
- Inverter installation and configuration
- Net metering and grid interconnection
- Monitoring system setup
- Compliance with Austin Energy requirements

Battery Storage:

- Tesla Powerwall installation
- Enphase and other battery systems
- Backup power configuration

- Load prioritization programming
- Generator coordination

Whole-Home Monitoring:

- Real-time energy consumption tracking
- Circuit-level monitoring options
- Solar production monitoring
- Cost analysis and reporting
- Smart home platform integration

Efficiency Upgrades:

- LED lighting conversion
- Smart thermostat installation
- Programmable pool equipment
- Energy-efficient appliance circuits
- Phantom load reduction strategies

We help you maximize your investment in sustainable technology while ensuring your home has the electrical capacity for modern luxury living.

5. Outdoor Living & Lakefront Electrical Section

The Hills' Lake Travis setting and favorable climate make outdoor spaces essential to the luxury lifestyle. Our outdoor electrical services transform patios, pools, and waterfront areas into functional, beautiful extensions of your home.

Outdoor Kitchen & Entertainment:

- Dedicated circuits for appliances (grills, refrigerators, ice makers)
- GFCI-protected outlets in appropriate locations
- Outdoor TV and sound system power
- Under-counter lighting and accent lights
- Ceiling fan and lighting control
- Weather-resistant electrical boxes and covers

- Proper conduit and wiring protection

Pool & Spa Electrical:

- Complete pool equipment installations
- Variable speed pump electrical (energy rebate eligible)
- Pool heater circuits (gas or electric)
- Salt system and automation controls
- LED pool lighting (white or color-changing)
- Spa controls and heating
- Water feature pumps and lighting
- GFCI protection per NEC requirements

Lakefront & Dock Electrical:

- Boat dock power distribution
- Dock lighting systems
- Boat lift electrical
- LCRA guideline compliance
- Waterfront landscape lighting
- Pathway lighting to dock areas
- Weatherproof boxes and components
- Proper grounding for waterfront locations

Landscape & Security Lighting:

- Architectural feature uplighting
- Tree and plant accent lights
- Driveway and entrance lighting
- Pathway and step lighting
- Security motion sensor lights
- Astronomical timer control

- Smart lighting integration
- Low-voltage LED systems

All outdoor electrical work uses premium weather-resistant materials and meets all code requirements for wet and damp locations, ensuring reliable performance in Texas' challenging climate.

6. Customer Testimonials from The Hills

"We hired Texas Electric and Light during the construction of our home in The Hills. They worked closely with our builder and technology integrator to create a comprehensive smart home electrical system. The pre-wiring was perfectly executed, and our Lutron lighting system works flawlessly throughout the house. Their professionalism and expertise made the process seamless."

— **Michael and Jennifer R., The Hills**

"Our outdoor kitchen and pool area needed complete electrical work. Texas Electric and Light handled everything from the pool equipment to landscape lighting. The result is stunning – our outdoor space is now our favorite part of the house. They were professional, on time, and their work quality is exceptional."

— **David L., The Hills Lakeway**

"We installed two Tesla Wall Connectors and a Powerwall battery system with Texas Electric and Light. They coordinated with our solar installer and handled all the permitting with Austin Energy. The installation was clean and professional, and the system has exceeded our expectations. Highly recommend them for anyone considering EV charging or solar in The Hills."

— **Sarah and Tom K., The Hills**

7. The Hills-Specific FAQs

Q: Do you work with builders during new home construction in The Hills?

A: Absolutely. We regularly collaborate with custom builders in The Hills throughout the construction process. We can participate in electrical design meetings, coordinate with your technology integrator for smart home pre-wiring, provide value engineering input to optimize your electrical budget, and ensure all installations meet your specifications and local code requirements. Many builders in The Hills know our work and trust us to deliver quality on schedule.

Q: How long does it take to install an EV charger?

A: A single EV charger installation typically takes 4-6 hours depending on the distance from your electrical panel to the installation location. This includes installing the dedicated circuit, running

conduit and wiring, mounting the charger, and testing the system. If your panel needs upgrading to accommodate the charger, that adds 1-2 days. We handle all permitting with Travis County, and most installations can be completed in a single day.

Q: Can you help us plan our electrical system during the home design phase?

A: Yes, we offer electrical design consultation for new home construction. During the planning phase, we can review architectural plans, recommend panel sizing and locations, plan smart home infrastructure, identify ideal electrical room locations, suggest improvements for energy efficiency, and ensure the design accommodates future needs. This proactive approach prevents costly changes during construction and ensures your home's electrical system perfectly suits your lifestyle.

Q: What's required for solar panel installation?

A: Solar panel installation requires several electrical components: main panel evaluation and possible upgrade, inverter installation and wiring, production meter installation, net metering interconnection with Austin Energy, monitoring system setup, and proper grounding systems. We coordinate with your solar panel installer to handle all electrical aspects, permitting with Travis County and Austin Energy, and final inspection. The electrical work typically takes 1-2 days, coordinated with your solar installer's panel mounting schedule.

Q: Do you service Lake Travis dock electrical systems?

A: Yes, we have extensive experience with Lake Travis waterfront electrical including boat docks. We're familiar with LCRA guidelines for dock electrical systems, understand NEC requirements for waterfront installations, use appropriate waterproof and corrosion-resistant materials, provide proper GFCI protection, and install code-compliant grounding systems. Dock electrical is specialized work, and our electricians have the training and experience to do it safely and correctly.

Q: How quickly can you respond to electrical issues in The Hills?

A: We typically respond to The Hills service calls within 30-45 minutes for emergencies. Our location in Dripping Springs provides quick access to the Lake Travis area, and we prioritize emergency calls. For scheduled service, we offer flexible appointment times including early morning or evening service to minimize disruption to your day. Our electricians arrive fully equipped to resolve most issues on the first visit.

Q: Can you integrate new electrical work with our existing smart home system?

A: Yes, we work with all major smart home platforms including Control4, Crestron, Lutron, and others. When adding new electrical elements to homes with existing automation, we coordinate

with your technology provider to ensure seamless integration, use compatible components and wiring methods, program new devices into your existing system, and test to ensure everything works together properly. We understand that maintaining your smart home experience is essential when doing any electrical work.

Include "The Hills" and specific service keywords (e.g., "Smart home electrical installation in The Hills Lakeway," "EV charger installation for The Hills luxury home")

Local Competition Notes

- Tech-savvy market expects modern solutions and smart home expertise
- New construction opportunities through builder relationships
- Energy efficiency and sustainability resonate with demographic
- Premium pricing acceptable for quality work and modern systems
- Quick response time important for busy professionals
- Online presence and reviews critical for younger demographic
- Integration with other trades (builders, tech integrators) drives referrals

Unique Selling Points for The Hills

1. **Smart Home Expertise:** Demonstrated knowledge of modern automation systems
2. **New Construction Experience:** Proven track record working with luxury builders

3. **Energy Solutions:** Comprehensive solar and EV charging services
4. **Contemporary Design:** Understanding of modern architecture and lighting
5. **Builder Relationships:** Known and trusted by The Hills builders
6. **Licensed & Insured:** TECL #28315, fully insured and bonded
7. **Fast Response:** 30-45 minute response time from Dripping Springs
8. **Comprehensive Services:** One contractor for all electrical needs from rough-in to smart lighting
